Connectorcoin

About Connectorcoin

Connector Coin was founded in February 2022 by The Super Connector for the purpose of ensuring legitimate connections between celebrities; artists and their communities. To prove the benefits of web3 for security, provenance and real personal value. The overall purpose is to ensure that all NFTs and experiences are validated and the process of accessing these resources is as simple as any other online shopping experience. Our platform will allow creators to launch their own collections where the public can buy their NFTs as simply as purchasing for an online shopping service.

Features

Education

Our mission is to make creating, consuming and accessing web3 assets and
services as simple as possible, to deliver this we will be ensuring our marketplace and launch pad are accessible through similar means to everyday online shopping experiences.

Anti Whales

Anti manipulation features to prevent pump-and-dump whale accounts from controlling the chart.

Marketing

Super Connector and Ryan the Crypto Plug the founders of Connector Coin are experts in marketing. Having worked on many projects in the social media, influencer and Crypto spaces they will bring their whole network of contacts and years of experience to this project.
